## New member of ash class

It was a normal morning on Thursday 8<sup>th</sup> October 2020 until Miss Duncan found a ruby red dragon! Our school cleaner found a dragon egg on the roof of the school, then we put it on our tech bench but it vanished. I was shocked because I didn't know how the egg had vanished without anyone touching it. Someone in our class realised the egg was gone. A few days later, Miss Duncan found the dragon in the plant, it was like a new member of ash class because he kept on appearing. We looked after the terrifying ruby red dragon but a few days later Mrs Myers is looking after it while we are learning. I'm happy she is looking after it so we don't have to deal with it, phew!

All around the class we found muddy footprints and bite marks out of the plant.

It was so strange because it was a normal day and we were doing writing and Miss Duncan was going to water the plant when she discovered the dragon.
