

LISS POST

DRAGON DISCOVERED

By Posy Wheeler.

On Thursday 8th October 2020 Miss Duncan, a member of Liss Junior school discovered a ruby, red dragon. He made her jump with shock, she found him nibbling on the plant in the class room.

On the 30th September 2020, Mr Haycock, the school care taker, found the dragon egg on the roof of the school while he was fixing it. He **stated** didn't know how it got there. A member of Ash class noticed that the egg was gone one week later. "We really like the dragon but he was tearing the plant apart!" detailed Miss Wheeler, a child in Ash class.

The reason that this is so important is that a dragon

has never been seen before, especially in school!

Ash class now own the dragon and the class love him. When the children are doing lessons, the dragon goes to Mrs Myers' office for safety.

Ash class hope that the dragon will be okay and that more dragons will appear in the future.
